SITUATION SUMMARY

Petroleum Sheen/Tarballs, Goleta, Santa Barbara County, SPILL 15-4934 and SPILL 15-4925

On 08/21/15 at 1936 hours, an NRC Report filed by City of Goleta reported a mousse like oil slick at Haskell's Beach in Goleta covering a 1 mile area. A similar situation was also observed at Ellwood Beach. SPILL 15-4925 was created.

- USCG investigated and determined the oil was due to natural seepage.

On 08/22/15 at 1149 hours, an NRC Report filed by a private citizen reported an unknown sheen 1 mile in size observed at 1900 hours on 08/21/15 near 7516 Seagull Drive in Goleta. SPILL 15-4934 was created.

- USCG is investigating to determine if this sheen can be correlated to the sheen at Haskell's Beach.

In addition, on 08/22/15 at 1258 hours, an NRC Report filed by Surfrider Corporation reported observing tarballs covering a 1 mile area at Haskell's Beach at 0700 hours on 08/22/15. SPILL UPDATE 15-4925 was created.

- USCG Sector Los Angeles/Long Beach advised per USCG Marine Safety Detachment on scene, the cause of the reported tarballs was determined to be natural seepage and correlates to the reported sheen from last night.

There are no requests for assistance or unmet needs.

The California State Warning Center conducted all appropriate notifications, including but not limited to local government agencies.

Cal OES Duty Officers are monitoring the situation and will provide updates as they become available.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- Increasing upper level high pressure to the east will bring southeast monsoonal flow into Southern California for possible afternoon and evening thunderstorms Monday through Wednesday.
- Strong gusty winds and low relative humidities will result in critical fire weather conditions from Monday afternoon through Monday evening for portions of Modoc County.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA

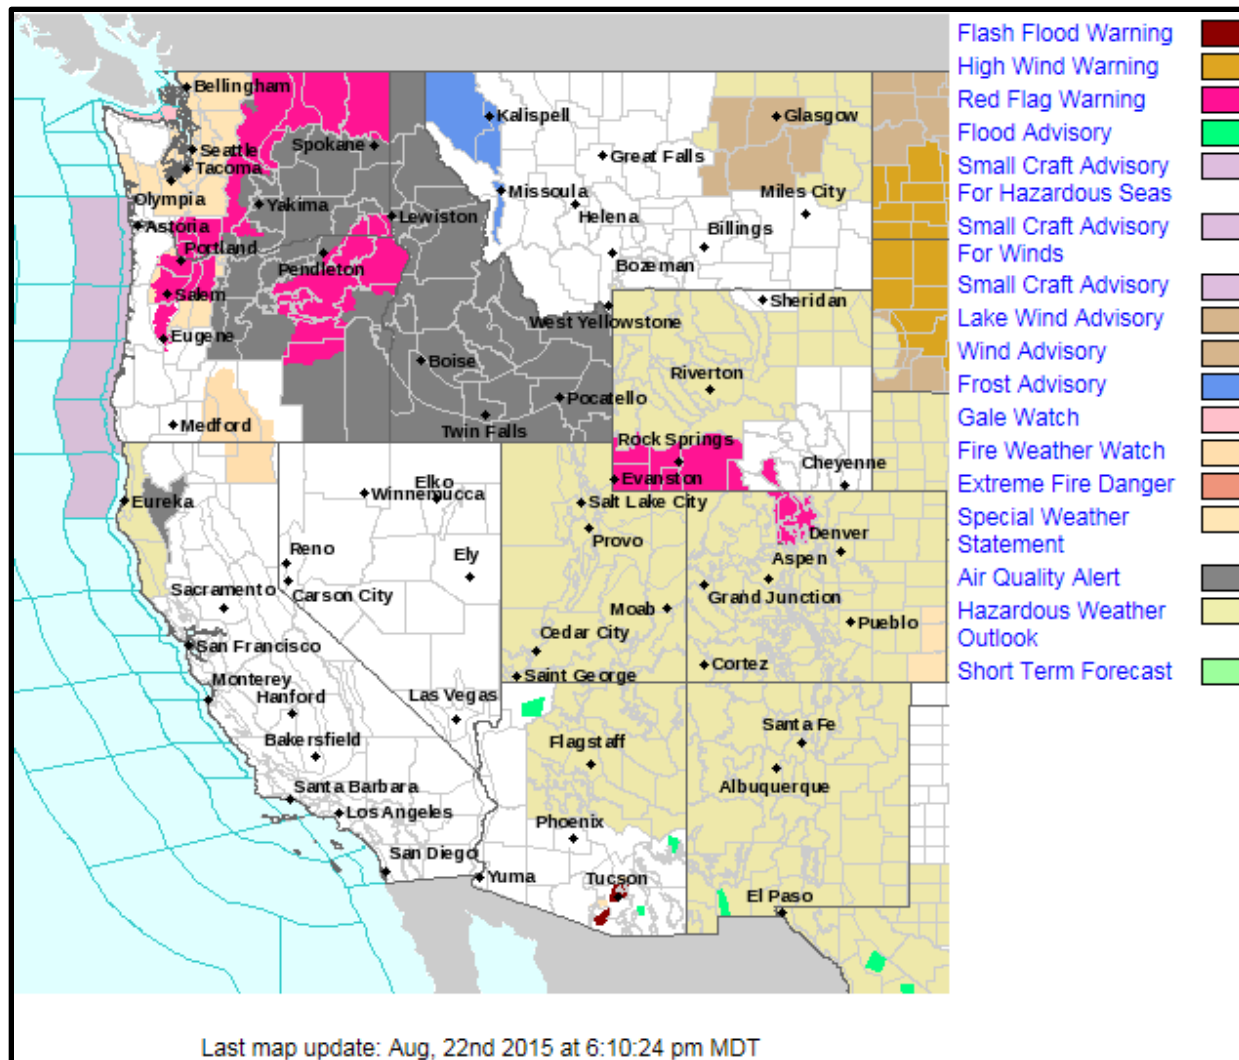

A high pressure ridge will build over northern California today and tomorrow. Warmer and dryer conditions with lighter winds can be expected. The resulting increase in stability will mean that inversions persist longer in basins and canyons, and smoke that settles near active fires in northwest California will be more dense, and not tend to lift up and drift out of the area, as has been the case in recent days. This will lead to diminishing air quality and visibility in northwest California. Mid and upper slopes are experiencing poor overnight relative humidity recovery. Light afternoon slope and sea breeze winds are expected both days. On Monday, the high will move back over the 4 Corners region as a low pressure trough deepens in the eastern Pacific. This pattern will bring increase south to southwest winds to much of the region, and it will persist much of next week. There is a slight chance of afternoon showers or thunderstorms in far northwest California each day, with better chances north of the Oregon state line. Temperatures throughout northern California will be cooler and humidity will be a bit higher, with better nighttime relative humidity recovery. The resulting decrease in stability from this pattern will mean that inversions break earlier in the day, allowing smoke to lift higher and drift to the north and northeast. This pattern helps vent fires and could lead to more active fire behavior. Current computer forecast models are indicating a possibility of monsoon moisture moving northward Tuesday, reaching the Bay Area and Lake Tahoe regions by Tuesday evening and spreading north over the entire area Wednesday. Thunderstorms with very light rain are possible with this pattern late Tuesday and Wednesday, but at this time confidence in this event are low due to lack of model consistency.

SOUTHERN CALIFORNIA:

Temperatures will warm across the region through the end of next week. Temperatures will be near normal today, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Widespread triple digit heat will occur across the inland valleys and foothills starting Monday. Minimum humidity will be mainly in the teens above and inland from the marine layer through the end of next week. Isolated afternoon showers and thunderstorms will form across the mountains and deserts of Southern California east of the I-15 corridor Monday through Wednesday. Winds will be fairly light through the end of next week, except there will be strong and erratic winds in and near any thunderstorm that develops.

SITUATION SUMMARY

FIRES, SOUTHERN OPERATIONS AREA

Rough, Vegetation Fire, Fresno County

Location: 5 miles north of Hume Lake and 2.5 miles southwest of Spanish Mountain

Jurisdiction: FRA

Start Time: 07/31/15 at 1933 hours

Per Cal OES, CAL FIRE, and ICS-209 as of 08/22/15 at [1754 hours](#):

- 47,079 Acres, 3% Contained

Evacuations/Shelters:

- Mandatory Evacuation Areas:
 - The Hume Lake Christian Conference was evacuated 08/18/15. Per the Cal OES Law Duty Officer (LDO) evacuation was accomplished in less than 2 ½ hours due in significant part to prior planning between Fresno Sheriff and the Camp Staff. The group of 750 to 1000 people were evacuated to a sister Church in Fresno for sheltering.
 - There are 250 mandatory evacuations in the National Park Campgrounds in the immediate area of Hume Lake Christian Camp.
 - There has been an evacuation of 32 private residences, believed to be all vacation homes in the Big Meadow and Heart Meadow Neighborhood.
 - Approximately 1,500 campers in several Kings Canyon National Park Campgrounds located along 10 Mile Rd have been placed under mandatory evacuation.
- EOC Activations: [Fresno County EOC is activated at Level 1 for the weekend.](#)
- The California Highway Patrol has also moved the road closure, which had been located at the intersection of Highway 180 and Hume Lake Road. The new road closure now sits further south on Highway 180 at Grant Grove Tree (approximately 2 miles north of the Hwy. 180 and Hwy. 198 interchange). The roadway will remain closed until authorities determine it is safe to reopen. The Sheriff's Office wants to make the public aware that no one will be allowed to enter the Hume Lake area; people will only be allowed to exit.
- Per CUEA, PG&E critical facilities and distribution assets are no longer in a high risk category for threats to power serving Central California. CAISO has reviewed PG&E facility locations that may be impacted by the fire and none of the locations would compromise the grid in any capacity. There would be no brownouts if these sites were impacted.
